

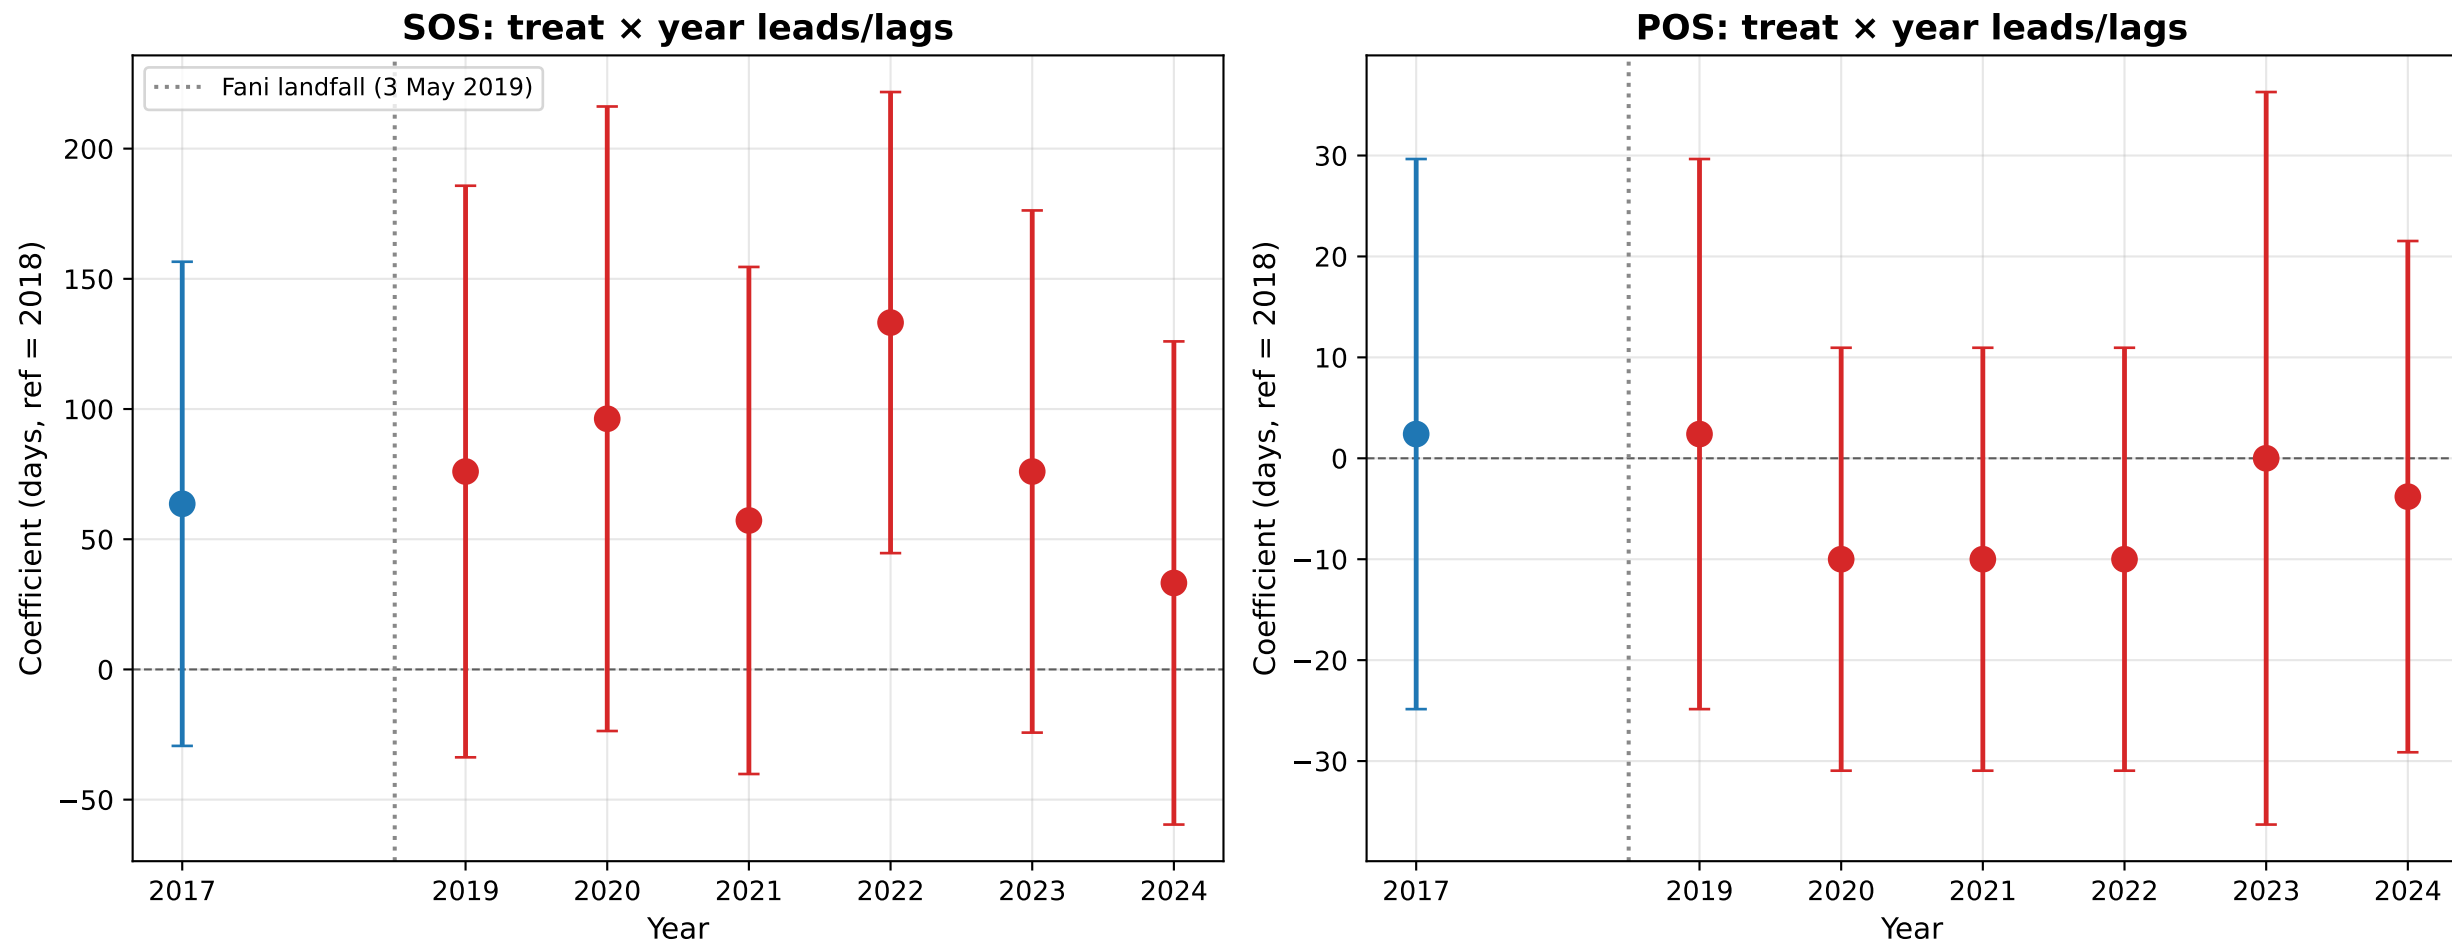

Figure 7. Event-study parallel-trends test (2017 pre-period lead, 2019-2024 post-period lags; ref = 2018)

Note: EOS panel omitted — within-year variance is zero (349/350 DOY boundary artifact); no event-study coefficient identifiable. Landsat-8 2015–2018 extension (Module 13) provides additional pre-period leads.
